If you like the bike trailer theme in some of the songs please contact me about organising a make-your-own bike trailer workshop. They are very worthwhile, resulting in cheap (<\$20), strong and good-handling bike trailers based on the design at <http://www.re-cycle.org/trailer/Trailerbw.pdf>.

then the air that we breathe will be fresher

we can save fossil fuels for tomorrow

Oh when the bikes ride to the school  
we will increase the health of our children

Oh when the bikes ride off to work  
then the roads will be much less congested

# 3 Ride my bike to save the world

Steven Muir 7/12/05 [www.cyclingchurch.org.nz](http://www.cyclingchurch.org.nz)

B E  
Ride my bike to save the world

Well I gave up my car to reduce my petrol bill  
Ride my bike to save the world  
Now riding on my bike that bill is next to nil  
Ride my bike to save the world

Well the more that I bike the less I get obese  
It's a sure and certain way for my health to increase

Well I will ride my bike when it's off to work I go  
And without all the cars what a pleasure I would know

Well I can ride my bike when my shopping I will do  
With my trailer that I built to load my food into

Well my bike it don't consume too much of fossil fuel  
No exhaust to pollute bikes are clean that's the rule

(x2)

With remote held in my hands  
I flick the channels to other lands  
Exercise I will delay  
My entertainment keeps it away

All my food is wrapped so nice  
It's so convenient i won't think twice  
Of the rubbish in the bin  
Can the planet survive the sin

Hire purchase i will buy  
Every gadget under the sky  
But the earth cannot sustain  
Such consumption without restrain

## 5 I like to go on my bike

Key C

C  
I like I like I like  
G7  
to ride on my bike my bike my bike  
C  
The greatest way to get around  
G7  
A good solution to all the pollution

C  
We should all get on our bikes

I'd always travel in my motorcar  
A bad habit that I learnt  
I saw the damage that I was causing  
It made me want to ride my bike

It was so cosy in my motorcar  
But I was getting overweight  
And the stresses of all the traffic  
I just had to ride my bike

It was so costly to fill my motorcar  
With the petrol to drive around  
And the pollution I was producing  
It made me realise I should bike

Just imagine when every person  
Is always riding on their bikes  
It would be peaceful and so much safer  
If we all could ride our bikes

## 6 When petrol goes up

Tune - when johnny comes marching home again  
Steven Muir 3/12/05 [www.cyclingchurch.org.nz](http://www.cyclingchurch.org.nz)

And we'll keep riding better get on your bike,  
better get on your bike

When petrol goes up eighty cents hurrah hurrah x2  
When costs go up the cars will stay,  
in the garage out of the way  
And we'll keep riding better get on your bike,  
better get on your bike

When petrol goes up one dollar hurrah hurrah x2  
The cars might just get left at home,  
the roads will be more pleasant to roam  
And we'll keep riding better get on your bike,  
better get on your bike

When petrol goes up two dollars hurrah hurrah x2  
When drivers go to fill their tank  
they'd better check first with their bank  
And we'll keep riding better get on your bike,  
better get on your bike

When petrol goes up three dollars hurrah hurrah x2  
Without exhausts we'll see blue skies,  
enjoy fresh air and exercise  
And we'll keep riding better get on your bike,

## 7 If it weren't for your bicycle

Tune - if it weren't for your gumboots  
Steven Muir 3/12/05 [www.cyclingchurch.org.nz](http://www.cyclingchurch.org.nz)  
Key G

G D C G  
Bicycles are wonderful, bicycles are swell  
C G  
They get you round so quickly  
Am D  
and don't cause any smell  
G C G  
You'll find it more relaxing to go home on your bike  
D G  
So why don't you get on a cycle

Chorus  
If it weren't for your bicycle where would you be  
You'd be stuck in traffic  
or getting more obese  
Bikes they give you exercise and save you lots of cash  
You'd better get yourself on a cycle

Well cars can have their uses, some people think the safe  
To drop their kids off at the school, to drive them to the gate  
The problem is the danger is mainly from the cars  
We'd all be safer if we'd only cycle

Cars they can be comfy, cars they can be warm  
You won't get very sweaty, or soggy in a storm  
But you could die of heart disease when you're thirty four  
So get some exercise on your cycle

Cars can be convenient, but they take so much space  
A cycle won't congest the road or spew fumes in your face  
No motorway extensions, we'd save a billion bucks  
So why don't you travel on your cycle

For supermarket journeys most people take a car  
But you could build a trailer and load it with tucker  
You'd save so much in petrol you could buy some extra treats  
So go and do your shopping on a cycle

Unlike the cars who guzzle gas and that is why I  
say
